# NATIONAL FLOORING EQUIPMENT SCRAPER APPLICATION GUIDE

## BLADES AND SHANKS

**NATIONAL  
FLOORING  
EQUIPMENT**

Made in America Since 1968

\*Refer to the National  
Flooring Equipment  
Product Catalog for  
specific part numbers and  
machine pairing.

### FLAT BLADES

National's flat blade selection includes the following categories. They are used for a variety of applications including soft goods, adhesives, and coatings removal.

- Standard Blades
- Guillotine Blades
- Blades with Slots
- Double-Edge Blades
- Heavy Duty Blades
- Extra Heavy-Duty Blades
  - 1-Inch Blades
- Razor/Scraper Blades

### INCREASED ANGLE BLADES

These blades are mainly used for VCT, but they can be used on most other applications. Increased Angle Blades are only for use on Walk-Behind Scrapers.

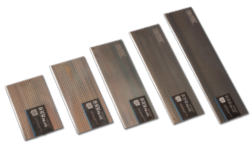

### SELF-SCORING BLADES

These angled self-scoring blades work on attached cushion, unitary or secondary backing, vinyl back, soft to medium PVC, linoleum, carpet, carpet tiles, soft cork, enhancer and unibond hot melts. They are available in a variety of sizes with 45- or 90-degree wings to ensure there is blade for your application and machine.

### SHANKS

Designed with varying widths, depths, and angles, National's shanks are able to take up the toughest hard goods and coatings.

- Straight Shanks  
(available with or without carbide tips)
- Angle Shanks  
(available with or without carbide tips)
- Wood Floor Shank
- Tapered Wood Floor Shank
- Ultra HD Angle Shank with Removable Carbide Tip
