MACHINE BREAKDOWN

CHOOSE THE RIGHT MACHINE FOR THE JOB

2900

The 2900DL ride-on scraper is designed for high-speed soft goods removal. This machine is a durable, emission-free, budget-conscious workhorse. The 2900 will remove VCT and other soft and hard goods quickly and efficiently for time sensitive applications. The DL version of this Ride-On Scraper offers users the ability to make infinite adjustments to the blade angle and pitch without leaving the operator's seat.

5000

The 5000DL is a compact, ride-on floor scraper. Featuring the same technology as our patented line of scrapers, this machine is designed with a low-profile frame that increases ease of transport and maneuverability on the job. A larger hydraulic pump delivers speed to this lightweight machine, making the 5000 effective in a multitude of applications.

5700

The 5700 floor scraper removes both hard and soft goods, and fits over 100 different varieties of tooling. Designed with operator safety and comfort in mind, and built to last, this machine is proudly Made in America. Twelve AGM 180-amp hour batteries, compact design, hydraulic steering, and a dual-lift front end make this scraper a powerhouse.

7700

When choosing the best ride-on scraper for your fleet, there are many variables to consider. Typical jobsite conditions, power requirements, removable weight, and speed are among those. The 7700 is bigger, heavier, and faster than the 5700, it is designed to remove difficult material and built to operate on almost any jobsite. Powered by 12 200-amp hour batteries, this machine is everything you need it to be.

5625

The 5625DL Ride-On Propane Scraper is the ultimate solution for commercial and industrial floor removal, offering unmatched power and precision with National's patented Dual-Lift front-end technology. This unique feature allows the operator to make infinite adjustments to the blade angle and pitch—without ever leaving the seat.

8000

The 8000 Propane Ride-On Scraper is built for high-performance floor removal, delivering exceptional power, speed, and precision. Designed for large-scale commercial and industrial projects, this propane-powered unit features National's patented carbide angle-shank technology and dual-lift hydraulic slide plates for superior blade control and efficiency.

RIDE-ON COMPARISONS

How do I decide what ride-on scraper is right for me?

The scraper that would work best for you depends on the type of flooring you typically take up, the square footage of your average job as well as how often you will be using it. If you are planning on using it infrequently, it may be more cost effect to rent.

If you will be using your machine often, you can make your decision based on if you will be removing hard goods, soft goods, both, and square footage:

What are soft and hard goods?

Hard goods include ceramic tile, hard wood flooring, and similar materials. Soft goods include VCT, laminate, carpet and similar materials.

Best for Soft Goods	Best for Hard Goods
2900	5000
	5700
	7700
	5625
	8000

***All ride-on scrapers are capable of removing hard goods.**
